Verbal Description

Prong from a complex censer. Shows no signs of decoration. There is a vent hole, off center of 0.8 cm diam, with some excess clay surrounding where it was not smoothed fully. There is also excess clay evident on the underside of the plate where the prong was apparently attached ~~to~~ to the plate. There is a dark firing core of about $\frac{1}{4}$ of the thickness of the plate. Heavy burning is evident ~~at~~ ^{all around} top of prong and on the outside face, especially at the top 4 cm, ~~there is~~ ^{also} where burning is heaviest. There is also moderate darkening on both sides of prong extending down from tip about 6.0 cm. There are also some signs of darkening from smoke on top of plate around prong. Some striations

are visible ~~at~~ ^{longitudinally} along prong. ~~Dark of plate~~
